JOEL CEDERBERG

TECHNICAL DIAGNOSTICS | SYSTEMS TROUBLESHOOTING | NETWORKING & DATA

Wisconsin | 575-626-8667 | lungbean@mailfence.com

PROFESSIONAL SUMMARY

Technical professional with experience in electromechanical systems, technical troubleshooting, and fault isolation across equipment and networked devices. Skilled in diagnostic reasoning, IP addressing and subnetting, and Microsoft 365, including macro-enabled Excel workbooks. Currently studying web design at Blackhawk Technical College, with broader technical interests spanning mechatronics, sensors and actuators, automation, and hardware-software integration.

TECHNICAL SKILLS

Electromechanical Systems • Mechatronics • Technical Troubleshooting & Fault Isolation • Electrical Diagnostics • Sensors & Actuators • Network Troubleshooting • IP Addressing & Subnetting • Hardware–Software Integration • Microsoft 365 • Excel & Macro-Enabled Workbooks (.xlsm) • Professional Email Correspondence • Technical Communication & Service Reporting • Technical Documentation • Root-Cause Analysis • Preventive Maintenance

PROFESSIONAL EXPERIENCE

Field Service Technician — Glory Global | *Present*

- Diagnose electrical and electromechanical faults, testing circuits and components to isolate failures and verify equipment operation.
- Troubleshoot network-connected equipment by identifying devices, checking IP addressing and subnet configurations, and investigating connectivity issues.
- Distinguish between equipment faults, network problems, and configuration issues through systematic troubleshooting.
- Communicate directly with customers to understand reported problems, explain findings, provide service updates, and maintain professional working relationships.
- Use Microsoft 365 and technical records to document service activity, communicate troubleshooting results, and support follow-up work.

Maintenance Technician — The LaundryHub

- Performed preventive maintenance and corrective troubleshooting on commercial laundry equipment.
- Evaluated electrical circuits and components through continuity, voltage, resistance, and capacitance testing to help identify faults.
- Inspected equipment, isolated mechanical and electrical problems, and carried out appropriate repairs and maintenance.
- Repaired damaged components for reuse where practical, helping extend component life and reduce unnecessary replacement.
- Communicated with customers and on-site personnel regarding equipment issues, maintenance needs, and repair status.
- Maintained inventory, service, and maintenance records using Excel while following established safety procedures.

Technician, Vending / Beverage Equipment — Keurig Dr Pepper

- Inspected, serviced, and troubleshot vending and beverage equipment involving electrical, mechanical, and refrigeration systems.
- Investigated equipment faults using systematic diagnostic procedures to identify causes and restore operation.
- Worked with refrigeration and HVAC-related components and systems as part of equipment service and maintenance.

- Supported equipment and parts workflows through SAP or other warehouse-management and inventory records, as applicable.

EDUCATION

Blackhawk Technical College — Web Design, Online Program

Currently enrolled • First year of a four-year program

Watertown High School — High School Diploma

ADDITIONAL INFORMATION

Analytical problem-solving • Evidence-based troubleshooting • Attention to detail • Following technical procedures and detailed instructions • Identifying inconsistencies • Clear technical communication • Independent learning • Adapting to unfamiliar systems and technologies
